

CMEDS Assessment Timepoints by Tool

CMEDS Assessment	Age of Target Child at Enrollment	
	Prenatal - 3 mos. old	Over 3 mos. old
Child Follow Up	• 1 month after birth • 6 mos. after birth • 12 mos. after birth • 18 mos. after birth • 24 mos. after birth • 30 mos. after birth • 36 mos. after birth	• 1 month after enrollment • 6 mos. after birth • 12 mos. after birth • 18 mos. after birth • 24 mos. after birth • 30 mos. after birth • 36 mos. after birth • 42 mos. after birth • 48 mos. after birth
HFPI	• 1 month after birth • 5 mos. after birth • 11 mos. after birth • 20 mos. after birth • 30 mos. after birth	• 1 month after enrollment • 5 mos. after birth • 11 mos. after birth • 20 mos. after birth • 30 mos. after birth
ASQ3	• 2 mos. after birth • 5 mos. after birth • 10 mos. after birth (optional) • 13 mos. after birth • 19 mos. after birth • 25 mos. after birth • 31 mos. after birth	• 2 mos. after enrollment • 5 mos. after birth • 10 mos. after birth (optional) • 13 mos. after birth • 19 mos. after birth • 25 mos. after birth • 31 mos. after birth • 37 mos. after birth • 43 mos. after birth
ASQ:SE-2	• 4 mos. after birth • 12 mos. after birth • 17 mos. after birth • 24 mos. after birth • 31 mos. after birth	• 4 mos. after enrollment • 12 mos. after birth • 17 mos. after birth • 24 mos. after birth • 31 mos. after birth • 38 mos. after birth • 44 mos. after birth

CCI	• 3 mos. after birth • 7 mos. after birth • 11 mos. after birth • 15 mos. after birth • 21 mos. after birth • 27 mos. after birth • 33 mos. after birth	• 3 mos. after enrollment • 7 mos. after birth • 11 mos. after birth • 15 mos. after birth • 21 mos. after birth • 27 mos. after birth • 33 mos. after birth • 39 mos. after birth • 45 mos. after birth
UISPP	• 3 mos. after birth • 14 mos. after birth • 26 mos. after birth	• 3 mos. after enrollment • 14 mos. after enrollment • 26 mos. after enrollment
Parent Follow Up	• Intake** • 6 mos. after birth • 12 mos. after birth • 18 mos. after birth • 24 mos. after birth • 30 mos. after birth • 36 mos. after birth • Program exit	• Intake** • 6 mos. after birth • 12 mos. after birth • 18 mos. after birth • 24 mos. after birth • 30 mos. after birth • 36 mos. after birth • 42 mos. after birth • 48 mos. after birth • Program exit
Other Caregiver Information	• Intake (if applicable) ** • Program exit (if applicable)	• Intake (if applicable)** • Program exit (if applicable)
PHQ-9†	• Prenatal • 2 weeks after birth • 2 mos. after birth • 6 mos. after birth • 12 mos. after birth	• 2 mos. after enrollment • 6 mos. after birth • 12 mos. after birth
Parent Satisfaction Survey	• 6 mos. after enrollment • 13 mos. after enrollment • 30 months after enrollment	• 6 mos. after enrollment • 13 mos. after enrollment • 30 months after enrollment
Exit	Immediately after a family exits from First Steps	

Additional Guidance on Assessment Timepoints

Families that enroll when the child is up to 2 years old:

- After completing the first timepoint, administer the next timepoint that reflects the child's age. For example, if a family enrolls when a child is 13 mos. old, complete the first CCI 3 mos. after enrollment (i.e., skip the 15 mo. timepoint). Then, complete the next timepoint when the child is 21 mos. old.

- There may be instances when the first timepoint falls at the same time or within one month of the second timepoint. When this occurs, consult your supervisor for directions.

Additional screenings

- Sites may administer additional screenings (i.e., PHQ-9, CCI, ASQ3, ASQSE-2) if clinical judgement indicates a need.

Assessments for subsequent children

†Screen the primary caregiver for depression (PHQ-9) 2 months after the birth of a subsequent child, with the 2 mos. after birth timepoint.

Families that exit program and re-enroll, families that transfer to First Steps from another First Steps region, or a different network

- Consult with AAPCA3 (jherbst@aapca3.org) for direction on assessment timepoints.

**Intake timepoint should be completed at the Intake enrollment visit.
