

First Steps Data Points To Tableau Dashboards and HFA Worksheets

CMEDS Exports – These items are generated for all dashboards and HFA worksheets generated by AAP-CA3

Client's 1st Service (Intake enrollment/L1P/L2P/L1)

Rationale: The date of the first home visit determines which year (calendar/fiscal) that families enroll in First Steps.

Client Services – The most recent service on the date that that data is exported from CMEDS

Rationale – To correctly categorize families under the current program that they are receiving services from, as families that transfer from one First Steps region to another will be represented under more than one region.

Exit Date - The exit date determines what calendar/fiscal year the family should fall under or whether or not the family should be included in the analysis or not.
